

Business Communications in the cloud

Vodafone One Net Business:
your evolution towards a fixed and
mobile converged service

Vodafone
Power to you

Reduce the number of missed calls with a simple solution from Vodafone

Vodafone One Net Business combines fixed and mobile services into one cloud-based solution, reducing the number of missed calls, making costs more predictable and keeping your business better connected.

Managing day-to-day communications can be challenging. A dynamic business communicates effectively with its customers and suppliers, no matter where its employees are located - whether in the office or off-site. Lost calls lead to lost business and lost time, while upgrading the fixed, mobile and communications system is often complicated and expensive. Capacity problems slow down telecoms and affect response time. As flexible working evolves, companies need to adapt to new situations and new ways of communicating.

Hosted Unified Communications (UC) services are at the core of business operations:

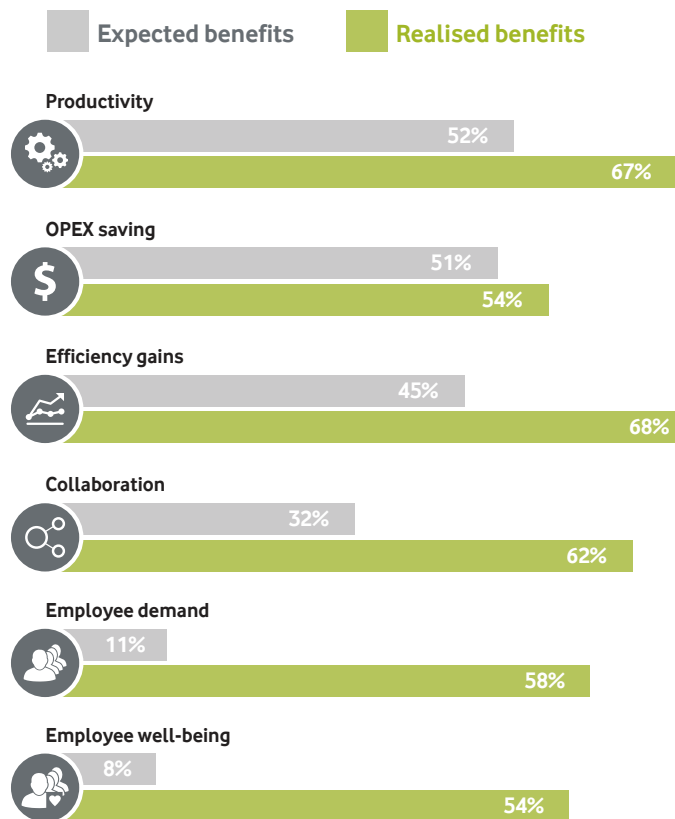

“ The trend of SMEs investing in ICT will support the growth of the hosted UC services market. Small businesses are eager to take advantage of UC applications customised to their needs, and hosted services offer them access to advanced communications at a predictable, monthly charge. Typically, with a short-staffed IT department and with limited access to capital funding, small businesses represent a natural target for hosted services. ”

– Frost & Sullivan

Vodafone One Net Business

Vodafone’s expertise and extensive know-how provides a simple solution for companies struggling with missed phone calls, complex mobile, landline phone and business communications systems, as well as high costs related to it. Vodafone One Net Business enables future-proofed flexible working within a pay-as-you grow model on our secure, managed, network.

Businesses are looking to move to unified communications to achieve meaningful benefits:

Effective collaboration at work

Vodafone One Net Business is designed to reduce the number of missed calls and missed opportunities. Be more collaborative in the workplace and reduce communication barriers.

Vodafone offers greater agility, productivity and efficiency with less complex solutions:

- 1. One number, one voicemail for your customers:** make or receive calls from any phone with a single voicemail
- 2. One provider, one bill, pay-as-you-grow:** for all fixed and mobile requirements
- 3. Future-proofed, simple technology in the cloud:** Regular new software releases and an easy-to-use online portal that lets you manage you manage your UC services directly
- 4. Direct calls:** get through to the person or team you need
- 5. Always ready to answer:** monitor the call availability of colleagues and direct calls as needed
- 6. Better collaboration:** through IM, presence, video and more...

Vodafone's hosted Unified Communications (UC) services provide all the benefits of

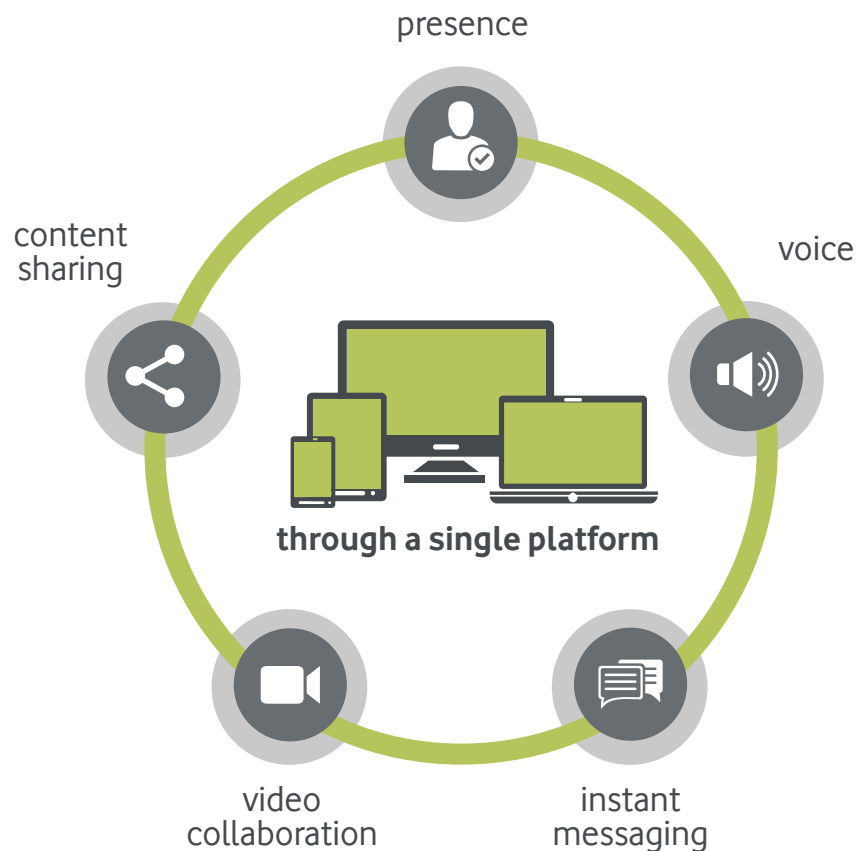

- voice including hunt groups, conference calling, call centre and receptionist functionality,
- instant messaging and presence,
- video collaboration,
- and content sharing through a single platform.

Why is hosted UC better than traditional, on-premise UC?

One package: Mobile and fixed access, single support route, fully converged user experience, single bill

Simplicity: Configurable for each user, easy-to-understand, intuitive, always upgraded to the latest feature capabilities

Cost saving: Optimal mobile tariffs

Bearmach improves communications

With five different locations, Bearmach needed a new telephony system providing seamless communications and full flexibility for the staff..

“Vodafone made a real effort to understand our business and took time to get to know us as people. We spent time with members of the Vodafone team with varying expertise and experience - it was very impressive. The ability to integrate desk phones and mobiles has had a noticeably positive effect on our ability to stay connected, to be accessible and contactable. It gives us a level of flexibility that we didn’t have before.”

– Julian Burgess, Finance Director, Bearmach on using Vodafone One Net Business

Bearmach also uses Vodafone One Net Business

As the world's largest independent distributor of genuine Land Rover parts and accessories, selling to more than 120 countries including several national governments, Bearmach was looking to improve their communications system.

Capacity problems addressed

Bearmach needed to equip the company's 160 employees with a telephone system that enabled them to communicate swiftly and effectively internally, to be agile when dealing with customers and suppliers.

Vodafone One Net Business simplified the management of their telephony system with transparent costs and one monthly bill, providing just what they were looking for.

“ Unfortunately we had outgrown our previous system. We were having capacity problems which were interfering with some calls and slowing down our data. In addition, with many of our customers based in rural locations, we were having signal difficulties. These issues were becoming more and more significant for us, and the time had come to address them ”

“ The ability to integrate desk phones and mobiles has had a noticeably positive effect on our ability to stay connected, to be accessible and contactable, especially with colleagues out in the field, both in the UK and abroad. It gives us a level of flexibility that we didn't have before. ”

— Finance Director Julian Burgess

Capacity and connectivity issues have been solved; the use of mobiles was extended to the warehouse staff as well with improved response times supporting Bearmach's growth in the UK and also overseas.

What does Vodafone One Net Business provide to you?

Feature	Benefit
Integrates fixed and mobile	Fewer missed calls, better customer experience and easy adaptability. Direct, monitor and switch calls whenever needed.
One number, one voicemail	No need for a separate landline and mobile number.
Hosted in the cloud and on our robust and substantial network	Getting rid of maintenance fees for on-site equipment reduces cost and complexity for the business.
